the investment climate

# It keeps getting better.

aban

And that's not our opinion alone. Take a look al these tables showing total foreigners' investments in Japanese stocks and bonds over the past three years:

Even more amazing, all that growth took place during a period of worldwide econamic uncertainty. The importance of Takyo as an international capital market and the yen as an international currency wan further recognition in 1976 with the affering of six issues af yen-denominated bonds by foreign governments and international arganizations.

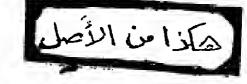

# Let Nikko introduce you to this climate.

If you are responsible for investment management of sizeable funds, explore the advantages of the Japanese securities market. And better yet, explore the advantages of dealing with Nikko. Our aperations are supported by the full resources of the Nikko Research Center, one of the most sophisticated invesiment and economic research centers in the world. The scale of our investment management experience and the degree of investor confidence we enjoy can be seen in \$2,967 million net assets af Nikko Investment Trust alone. For further information on the Japanese market, contact your local Nikko representative below.

### ahead?

Precisely when should you turn off? At what speed should you drive when approaching congestion points? -30 mph ... 40 ... 50 ... 60 ... ? A new driver guidance system, called ALI (standing for Driver Guidance and Information System) is providing the answers at the extensive Blaupunkt works in West Germany.

You get into your car, tap out your destination on a small coding device which looks much like a pocket calculator and from then on, all the information you need concerning where and how to drive is flashed up on to a small display face (no bigger than your hand).

With ALFs guidance you can always take the quickest route. You need no road map, nor any knowledge of the area you are driving in. ALI will give you advance warning of unfavourable weather and traffic conditions all along your route. ALI will even tell you whether it is worth making a detour to avoid congestion spots and, if so, which alternative road to select.

### How ALI works for you

An induction loop is set in the road surface before each road junction. This loop both receives and transmits information to and from an electronic station mounted at the side of the road.

Each of these electronic stations is linked to a central computer. As a vehicle passes over the induction loop, it transmits to the nearest electronic station its speed, its destination and whether it is a passenger car or a goods vehicle.

From the millions of incoming signals reaching it, the central com-puter calculates the ideal speeds and routes for each individual vehicle.

ALI may seem to be a science fiction fantasy. But this revolutionary

How much would ALI cost? Probably no more than you would pay for a car radio.

The cost of the other equipment represents only a tiny proportion of current expenditure on motorway construction.

### There's more to Bosch than you think:

Your car engine almost certainly has some Bosch parts; and it may well be tested by Bosch equipment at its next service.

Many of the goods people buy in their supermarkets have been packed with machines produced by Bosch. These provisions may be stored in a Bosch refrigerator or freezer in a Bosch kitchen.

Television viewers will have seen the Olympic Games through Bosch eyes, as many of the sporting events were televised by Bosch Fernseh cameras. News and entertainment incars can be received with Blaupunkt auto sound systems.

Bosch electric power tools are at work on construction sites world-wide. Bathrooms and kitchens are equipped with Bosch fittings and built-in units. Deep-cooled blood stored in many European hospital blood-banks is restored to body temperature with Bosch medical equipment.

Bosch employs 5,700 people in research and development alone. Bosch have at present 10.000 patents through-out the world, with 15,000 pending.

Robert Bosch Limited, Watlord, Hertfordshire

# The Heart of the Turbine Is Ready

This turbine rotor, along with others like it built by Kraftwerk Union (KWU) in Berlin's Tiergarten district, will soon be producing light in some part of the world. Every second power plant in West Germany is equipped with gas and steam turbines manufactured in Berlin. Berlin-built turbines also generate power in the Near East, in Brazil and at Hendrina, Africa's largest power plant. The know-how and accomplishments of Berlin industry are valued highly troughout the world.

In many countries, "Made in Germany" is synonymous with such Berlin companies as Siemens, Borsig, Zeiss-Ikon, Schering and AEG-Telefunken. If you would like to know more about Berlin's economy, write: Senator fuer Wirtschaft, Martin-Luther-Strasse 105, D-1000 Berlin 62, Germany.

# WE'D BE THE FIRST TO **AGREE THAT CARBON** HAS LEFT ITS MARKON **BUSINESS EFFICIENCY**

Carbon was introduced over a century ago, to provide a quicker method of making copies. So, to be fair, it merits a Long Service Award. But in today's office environment, it is frankly out of date.

In the name of progress, it's worth looking at some of the comparative advantages of Idem carbonless copying paper. Each sheet of Idem carbonless looks and feels like any

ordinary office paper-but when it comes to making copies with Idem, there's no separate sheet of carbon to interleave, line up and separate afterwards.

With Idem carbonless copies, all that's required is to write type or print on the top sheet in the normal way.

And because each sheet of Idem has been specially processed, whatever is written, typed or printed is automatically transferred immediately into the sheets beneath.

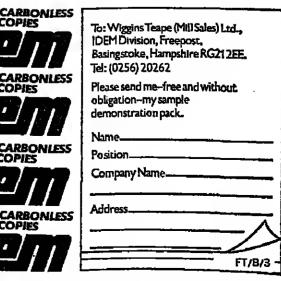

The resulting copies-for sales, invoicing, accounting, delivery, stock control, correspondence-are clean, clear and reliable.

At the same time, the production of those copies is quicker, easier and more convenient.

And therefore more cost efficient.

But there's more to Idem carbonless than is evident from the telling in brief.

Ask your printer for the full story. Or complete and post the coupon for your free sample demonstration pack.

Idem Is made by Wiggins Teape, Papermakers to the World. All the advantages of carbon, without the disadvantages

Marria 20 

# mean you're selling out. vil service disput UCS

There comes a time when the shrewdest move you can make is to look for equity finance.

Indeed, the faster you're planning to build your business, the wiser it is to strengthen its base.

And, at the same time, let someone else share the risk.

olicy

After all, a risk shared is a risk halved. Even though, at ICFC, we never want anything like a half share in your business.

We only buy a minority holding. And the decision to sell is always yours. So it stays your business.

Our business is only to invest in businesses. Not to run them.

Right now, we have equity investments of £56 million in over 800 companies. As well as the £155 million we've loaned to 2200.

Put simply, if we can help your business succeed, our gain is your gain.

The smaller business's biggest source of long-term money. BRIGHTON 0273 24391 BRISTOL 0272 292081, CAMBRIDGE 0223

BY MARY CAMPBELL

A COMPANY may go to great tengths to match its foreign encreacy Bahitistes and assets yet still find itself with a large tax bill because of the Revenue authorities views on changes in currency values.

This is one of the points maile in a hooster written by John Chown and Malcolm Figner. The gine of the booklet, which epilates some of the authors' previously published works as well as containing new material, is to ston low tax considerations tear no company' foreisa currency orrangements.

To maste a single example: a Bruish comeane which horraved S1m, to hav property in the U.S. or 1971 meth. in selling the property after five years for \$500,000, make a real loss of \$209,000 (ly is assumed that the become from the property exactly halances out the interest paid on the two ratentated in U.S. 5).

Rowever, because of changes in evcloacer rates between 1971 and 1976, the company wante show a tayable profit for the purpose of the U.K. Ioland Revenue of £80,049; in sterling from the property would have here honght for L403,000 (SIM, at an eveluance rate of \$2.48 per 51 and sold in 1976 for £182,0041 (\$\$00,000 at an exchange rate of \$1.66 per 1).

Apart from knowing the rules, the twoklet suggests three steps which the corporate planner should take in managing foreign currency positions. The tirst is to analyse the real foreign exchange exposure of the compans or group; the seennd is to take a view (or preferably a range of views) un the likely currency movements; the third is to aptimise the risks, taking account of the varions ways in which far can distort the risk/reward relationship.

Foreign Currency Debt Management: bu John Chorn and Malcola Finnen-published by J.F. Chorn and Co. (21800)

Bournemouth 1927. Bath chairs at 1/6d. per hour.

National unemployment had topped two million and it was only a year after the General Strike. Hardly a time or birth-place for a new enterprise, but James Bowmaker and George Kendrick thought otherwise. On 31st October 1927 they started Bowmaker with a capital of £10,000. In 50 years of continuous growth Bowmaker has been developing and improving credit facilities so that today there is a truly comprehensive range of instalment finance schemes available.

Bowmaker Head Office in Bournemouth today

خجب

With a network of branches throughout the British Isles to ensure there is local representation in almost every part of the country, Bowmaker can provide both the dealer and the customerwith a fast and professional service.

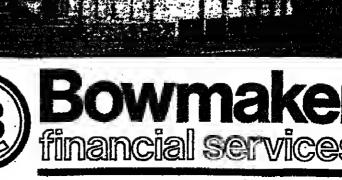

th in 1927

Fast, because that is what the customer wants — professional, because the ever-increasing complexities of today's business and financial life make it more than ever necessary to deal with a well-established and experienced finance house.

Services to industry include leasing, industrial hire purchase and lease purchase. There are also plans for fleet operators and a Farmplan for the farming industry.

**DIVIDENDS ANNOUNCED** 

Although the Group is now represented and active all around the world, we have not forgotten that it is people who make our business: our own specialists and managers in head office and branches working alongside other people - our customers. The success of this team effort can be seen in these samples of the Group's activities - as they happen. They are the result of people's efforts. That is what Grindlays basis on.

What does

Grindlays bank on?

The Grindlays Bank Group has come a long way from its beginnings

in the 19th Century. In 1977 we are a major international bank

-a world leader in certain areas-but we work hard

to preserve the traditions that put us where we are today.

THE GROUP'S EXPORT FINANCE DEPARTMENT SIGNED THE FIRST UNSYNDICATED DOLLAR BUYER CREDIT UNDER ECGD REGULATIONS. Our specialists visited Korea and arranged a financial package which included both export and eurodollar commercial credits for the Korea-Iran Petroleum Company and a major U.K. supplier on a petro-chemical refinery project.

economy after a 15 per cent. increase in its packaging volume sales in the first half. In the U.K.—which together with Eire contributes around 70 per cent. of profits—volume salea increased by 6 per cent. reflecting a period of reartabling he induce in the of re-stocking by industry in the early part of the year. This early part of the year. This re-stocking has now tailed off, as expected price increases failed to materialise. The only really black spot in an improving trading picture bas occurred in the U.S. and pre-tax profits here are unlikely to match last year'a f1.7m. In addition the trading desl with Svenska Celluloss ahould iransform the balance sheet with the £16.5m. generated to be used to wipe out borrowings expected to be around f15m, by the year end. Dividends which are unaffected by restraint rules are likely to be 11p gross (8.25n) for a yield of 6 per cent. at 185p.

Sales 1000 Trading profit 6.519 Associates 13 Profit before tax 6.822 Taxation 2.356 Extraord, debit 4 Miboritles 722 Available Ord. an 3.741

Jefferson Smurfit's pre-tax profits rose by almost 48 per cent. in the first-half and full-year profits may, now approach f15m. after f10.6m. last year. The group remains bullish about the Eire economy after a 15 per cent.

• comment

### Advance by Guildhall Property

Pre-tax profits for the year to June 30, 1977 at Guildhalt Property Co. advanced from £475.458 to £544,635 after £253,930, againsi £230,510 for the Orst half. Earnings ara shown to be ahead from 3.74p to 4.4p per 25p share and the dividend is lifted from 2.1655p to 2.4105p net with a final payment of 1.908p.

Dividends shown pence per share net except

Notice is hereby given that on fith September, 1977 the Directors of AECI Limited declared a dividend at the rate of 51% per annum for the six months ending 15th December 1977 payable on that date ro holders of preference shares registered in the books of the Company at the close of business on 4th November 1977.

The dividend is declared in United Kingdom currency and warrants in payment will be posted from the uffices of the transfer secretaries in South Africa and the United Kingdom on 13th December 1977.

Dividends payable from Johennesburg will be paid in South African currency at the rate of exchange ruling on 4th November 1977.

Any change of eddress or dividend instruction Involving a change in the office of payment, if intended to apply to this dividend, must be received on or before 4th November 1977 and members must, where necessary, have obtained the approval of the South African Exchange Control Authorities and, if applicable, the approval of any other Exchange Control Authorities having jurisdiction in respect of such changes. Changes of address or dividend instructions to apply to this dividend which do not involve a change in the office of payment must be received not later than ist December 1977.

In terms of the Republic of South Africa Income Tax Act 1962 (as amended) dividends payable to persons not ordinarily resident nor carrying on business in the Republic or to companies not registered nor carrying on business in the Republic are subject to deduction in respect of nonresident shareholders tax at the rate of 13.7025 %.

With regard to warrants, despatched from the United Kingdom office. United Kingdom income tax, at the basic rate icss, where applicable, the appropriate double tax relief, will be deducted from the dividends paid except in relief, will be deducted from the dividends paid except in cases whare the holder's address and the address to which the dividend is sent are both outside the United Kingdom and in cases (if any) where the company has received from the inspector of Foreign Dividends in Great Britain a certificate exempting the dividend from United Kingdom

The transfer books and registers of members in Johannes-burg and the United Kingdom will be closed from 5th November 1977 to 18th November 1977 both days inclusive. Carl

1976. Mr. Rose says that sales of its spring 1978 collection are going well, while in Holland, Elvi re-ports an encouraging start to the season with a good level of orders. In Britain it is expected 11. At the AGM that the group holdere Exwand debus... 11 trd 77 advance with a 35 per cent. gain that all previous seesons orders in the first half of the group had debus... 11 trd 77 advance with a 35 per cent. gain that all previous seesons orders in the first half of the group had had he contributed to be presenting a sub-stantially better second half is a production are shaping up well and Lerose the debug first half of a sub-stantially better interim report. However, he warned that june 30, 1977 Central and Sheer 72, per cent. is clearly expecting in sub-stantially better interim report. However, he warned that june 30, 1977 Central and Sheer 72, per cent. is clearly expecting a sub-stantially better second half is a prospective interim dividend, which is to prove the halance of payments. In that company, re-bort Ransomes and Rapler in dividend, which is to be more than equalled by the is one of only a handful of 3,2009 is predicted against 3,51048p helped the company to earn addit in ternasts of the group's company to earn addit in the substantional, of hulding these massive industry wards and reprosed and the size of the group's company to earn addit in the substantional, of hulding these massive industry to the company to earn addit in the substantion of Photopia International, of hulding there massive and and the substantion of the source and chain the additional the transfer and deliver. In the company's company control international, of hulding there massive industry was to the company's and Rapler, both source. Meanwhile direct and in adjustment.

NEXT APRIL FOOL'S DAY, MAKE SURE THE JOKE'S NOT ON YOU - OR YOUR EMPLOYEES. The new State pension scheme comes into

effect April, 1978. You as an employer need to decide if your

employees are to stay in the State scheme or be 'contracted out' by providing an adequate pension through your own Company scheme. Since the procedures covering 'contracting out' require a three months' period of notice a decision is required now.

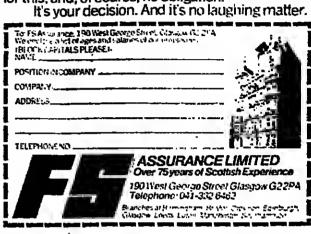

The decision is not as clear cut as it sounds. It varies greatly from one company to the next. In fact, it's so complex that many intelligent laymen are frankly confused.

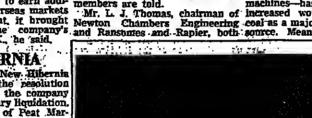

No less a source than the Financial Times admits: "The decisions that have to be taken by top company executives require detailed advice and guidance from pensions experts."

At FS Assurance, we've been providing pension schemes since 1899. We specialise in schemes for the small-to-medium sized company. Providing a personal service. A flexible service.

We will be happy to have our pensions experts calculate what it's going to cost your company for a pension scheme of its own. And we'll provide the detailed advice and guidance you need. Ask your brokers to contact us or just send us a list of the ages and salaries of all your employees. There's no charge for this, and, of course, no obligation.

It's your decision. And it's no laughing matter.

# construction company owns 100 quarries with reserves of 3000 million tonnes of stone?

But where do these huge natural resources go?

Only about one third of our annual production becomes road surfacing. The other two thirds is sold for the manufacture of such diverse products as iron and steel, chemicals, adhesives, sugar, glass, plastics, rubber, ceramics, cattle foods. Not to mention vast quantities for concrete, rail ballast and filter beds.

We also manufacture and lay more roof waterproofing materials than any other company in Europe.

Our private house building operation is the 3rd largest in the UK.

And on any day of the year we're engaged in as many as 700 building and civil engineering projects at home and overseas.

This strength in depth gives us a unique balance in the construction industry.

# Rich in resources. Big in construction.

All and their activities are molementary to each other. in competitive .... In interitional jargon, they are ment institutions" or HIS "

Worldwide, the last four ars have not been easy ones Fine collective investment han Highry. After rapid expanand of collective investment the 1950s and in the 1960s tall economies with devel-Stock Exchanges, there been a setback in this. This has affected both and and and open-traied funds. Stock markets over the world bave been a ignant and share prices have ged bebind inflation. The covery from the trough has en weak and besitant and iny holders of CLLs in this pre output (fillusioned.

in the early 1960s in the if trust industry, we used englain the nature -ofheary shares by saying that: ssion of an ordinary. DÓ. ire in a company entitled. .... holder to a slice of the ppany's earnings and assets principles behind : Collective

and that these would maintain their real value in spite of inflation. Unfortunately, it has not worked out like this. A combination of economic circumstances, together with dividend controls and adverse tax and employment legislation, have weakened the position of the ordinary sharebolder so that in a sense he is less the oweer of the buainess

than be used to be ... It bas become painfully apparent that there is no investment of any type which provides an antomatic counter to inflation.

cannot

### The Private Investor

Private Investors as a whole bave been net sellers of equity shares. ordinary shares in the market. and the long-term trend of sbareholding out of private hands into the hands of the financial. institutions: has accelerated. Although many institutions bold important stakes in investment trust companies, the principal appeal of the latter is to private investors and the overall trend bave helped the but demand for investment trust sbares. Moreover, private investors tend to be more stable bolders than institutional fund managers and institutional dominance has increased the volatility of the market and paradoxically added to the problems of the institutional fund manager: A 12423tions, Nevertheless. all ... Is ... not.

gloom. In the UK; the basic

Investment Institutions spread of risk, professional investment management and ease and cheapness of administration-proved their worth aod soundness in these very difficult circumstances. particular, for individual investors the factor of ease of administration became even more important owing to inflation of the costs of managing a private portfolio. Dealing costs. accountancy costs. the preparation of tax returns and double taxation claims, etc., bave all escalated and are minimised by holding a bandlul of investment trusts or

unit trusts rather than a porifolio of directly managed We must ask ourselves why. therefore, despite all these manifest advantages. Collective Investment Institutions have failed to maintain their growth. Part of the explanation is undoubtedly the disappointing performance of equily shares worldwide, to which I bave already referred. there has also been a marked swing into fixedinterest securities, encouraged by high interest rates. However, the room for manoeuvre for the collective investment industry in the U.K. to improve the popularity of its products by branching out Into fixed-Inferest securities is bampered by fiscal considera-

The unit trust industry, unlike the open-ended mutual fund industry in the United States, managed to avoid contracting in size (i.e. buying back more poits than it was selling) by active marketing of units. Although direct response to advertisemeots fell off, and newspaper nf. advertising ceased to be economic, other means of selling were actively developed. In particular, the flow of regular savings into unit trusts through linked iosurance poli-cies bas become a very important factor in the sales of units. Direct marketing of the shares in iovestment trusts is not open to investment trust managers and the consequent lack of demand has been reflected in the wideoing discount between the price of investment trust shares and their net asset value-

### Increasing Popularity

Nevertheless: in my opinion, much can be done to increase the popularity of investment trusts. Presentation of the ease through advertising can help, both specifically on the merits of investment trusts and more generally on the advantages of investment in equity shares, reiterating the vital role of profitability in the economy. This present series of advertisements is an example of what can be done. to stimulate public awareness. It is very much io the interests of existing investors in investment trusts that the market in their abares should be trust industry. widened. An increased demaod will narrow the discounts on net asset values. It might also eventually lead to a position where investment trust funds could resume their expansion. This would assist the investment managers of the funds, by enabling them to alter the balaoce of the partfolio withamount of money in a sbare out having to reslise other by regular instalments over 9 investments." I. should like to conclude suggesting some ways with other than advertising by which the investment trust in-

dustry could encourage the sales of investment trust shares. without falling foul' of the Preventioo of Fraud (Investments) Act which requires the publication of a full prospectus for any public offering shares. Advertismente, circulars and seles literature for; unit trusts are not so hedged with restrictions. although they must · be approved in advance by the trustee and by the Unit Trust Association, who require a high standard of presentation to be observed. Investment trust managers could take advaniage of this comparative freedom by combining with

**Contractual Savings** Contractual sevings through financial institutions, mainly pepsion funds and insurance companies, bave been a major factor in the institutional domination of the equity market, to which I have already referred. Investment trusts could actively encourage contractual savings plans by co-operating with insurance companies to promote life assurance policies linked to investment trust shares. In this way the powerful backing of the regular saver would be put behind the investment Moreover. regular saving through Collective Investment Institutions is the best way for the smaller Investor to start on stock exchange investment. The regular buyer benefits from the principle of pound cost averaging - the arithmetical rule that if you invest a given

period of time, the average rost to you of your shares will always be less than the average of the prices on the days you bought them. This is because

a given amount of money will buy more units in a month when their price is low than it will in a month when the price is bigh. In effect, the volatility of the market works in favour of the regular buyer of shares, who also avoids the insoluble problem of bow to buy al the bottom of the market and sell at the top.

### Unitisation not the answer

It is sometimes suggested that the answer to the problem of the discoupl on investment trust shares is unitisation-the cooversion of a closed-ended investment trust into an openended unit trust. Except in comparatively rare and special cases. I do out myself believe that this is the right answer. Although unitisation would enable holders to obtain near net asset value for their holdings and would enable managers to adopt more ective marketing policies. the redemption of prior charge capital would present difficult problems and the adventage of gearing would be lust. A more promising approach. Ihough one which woold require legislative sanction, is a hybrid between an iovestment trust and a unit trust, on the lines of the Dutch investment company, Robeco. It might also be considered whether the full prospectus treatment, necessary in the case of grading companies, is really required in the case of a properly constituted investment trust. In the event, the ideas

which I have put forward for increasing the popularity of investment trusts may prove quite unnecessary. An increasing awarenes of their real investment merits and their use in private and institutional portfolios, coupled - with reiving interest in the equity share market; may effect the cure to the problem of the discount without structural changes.

Around the Market by Patrick Wiener **Capel-Cure Myers** 

been expecting the bidder for Edinburgh and Oundee to reveal his identity and specific intentions, Nnw, an unexpected offer has emerged for British Investment Trust by the National Coal Board. The difficulty in reaching a consensus between a suitor seeking 90%, success and a board of directors defending a full 'geing concern' nel asset value presumably accounts for the delay in the first case. It will be instructive to see if the N.C.B.'s endeavour succeeds, since full integration seems not to be mandatory. Earlier this year seven trusts were taken over. but in every instance the offer was in the form of paper. Based on the market value of these hids, the terms ranged from a discount of 5%, ho n.a.v. up to at high as 14% premium for a very small concern. Un the basis of underwritten values, huwever, the discount ranged between 13% and S%

Trusts have maintained a firm performance. Relative to the All-Share Index, the investment trust sub-index stands al 92 against a low print of SU.6 some seven weeks agn, whilst the dividend yield relative has fallen in that lime from 98.5 to 85. Historically, these rating, remain cheap, Yet there is a sneaking suspicion that in the near term further headway will be difficult to achieve, unless bid

fever runs unduly high. This paradox reflects the seemingly poor asset growth which will inevitably emerge during a periud when the UK slock market significantly outperforms Wall Street, where the bulk of the movement's overseas investment is still concentraled. In jurn, il poses

For over a month, we have the question as to whather or not trusts should be looked on as just another seems of the UK market. On past evideoce, the answer is very much in the attirnialize, and has often been reflected in a narrowing of discounts-as recently-when London has stolen a march on New York, and vice versa. Furthermore, the turn-

27

ADVERTISEMENT

around in sterling over lite past year, logether with the fall in the doller premium, has accentuated this trend. It is largely through organic to some extent change. instered by repairiation, dat in the past lour months the North American content of the top 130 trusts has on average Tallen from 28% to 22%.

Since the beginning of 1977, when we started to plot different segments at the market, trusts with above average exposure to the UK have done scambeauty better than those heavily committed abroad, by a margin of some 20%. This, however, family reflects the difference in asset growth, since the relationships between the overage discounts of the too groups has been far more constant. Recently, however, with trusts advancing on a broad from, some discount anomalies have appeared, and the dear stocks, unsupported by a high yield or exceptional

assel growth, look ruinerable. The tendency for discounts to remain in tairly constant relationship to one another-as opposed to variations in the average level-supports the theory that trusts are largely homogeneous and rarely change their spots. It is axlomatic that the theory depends on markel forces; yet there are incipient signs of a more fundamental approach which will in time lead to a far more selective market.

The information in the columns below is supplied by the companies named, which are members of The Association of Investment Trust Companies. **Net Asset Values** The figures, which are in pence except where otherwise stated, are unaudited.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | the pualic offer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | that "Instrumentation is proceeding. The hirst of the three<br>stillings this energies and is being filled with water Carbon 1<br>19. The construction of the remaining two thickeners is well Shaft an<br>lid und une atem fisht, ull mulor structures and vessels see No. 2.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | ealing. Construction of the 1 000 ions s duy sold plant is almost No. 3 .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | gafontein Mines Limited
